In his visit to the enemy's prisoners of war in Abyan

The leader Hamza al-Mukrishi: We will treat you with the Islamic teachings concerning the prisoners of war

The leader Hamza al-Mukrishi in his meeting with the enemy's prisoners of war

Bal'aeed, better known as Hamza al-Mukrishi - The Amir of the Supporters of *Shari'ah* in the state of Abyan - has affirmed through his speech to the captured soldiers of Sana'a's government that the mujahideen will treat them in accordance to the teachings of Islam with regard to treating the prisoner of war, contrary to the oppressive and inhumane treatment which those captured among the mujahideen are faced with in both the national and the political prisons.

Al-Mukrishi said during his visit to inspect the soldiers who were captured last week by the mujahideen of the Supporters of *Shari'ah* in the raid which they called " *Qat'u-Dhanab*" [i.e. Cutting off the tail]: "We are not happy that we have captured you and we ask Allah to guide you. . . I mean, did we come to your houses to capture you or was it not you who came to the outskirts of Zinjibaar to fight us? You should understand very well that we are all under occupation! American and Saudi air force have violated the airfield, American, British and French warships have occupied the sea.

We will treat the treatment of the prisoner of war and this is what our true religion orders us as Allah says : ***{And they give food out of love for Him [i.e., Allah] to the needy, the orphan, and the captive,"} [76:8]*** So you'll eat from the same of what we eat and be clothed from the same quality of clothing that we clothe ourselves with.

Al-Mukrishi have also underlined at the same time that Sana'a's government have to release the imprisoned mujahideen from both the national and the political prisons in exchange for releasing these soldiers, that is if this government is genuine in its claimed concern for its soldiers or at least considers them to be of humankind!

On the other hand, an official of the Supporters of *Shari'ah* informed our correspondent that the mujahideen don't rule out the possibility of American or Saudi air force targeting those captured soldiers to get rid of them, just as the same occurred in the sixth war between Ali Saleh's soldiers and the Houthis, when the captured soldiers by the Houthis were bombarded in Sa'adah. On his part; an official of *as-Shari'ah* Supporters made clear that both the American ambassador in Sana'a and Abdorabo Mansoor are held accountable and will have to put up with any possible consequences that might happen concerning the case of the 73 soldiers.

An official of the Supporters of *Shari'ah* criticizes Abdorabo's declaration of war on al Qaeda while calling the Houthis for negotiation

Muhammad Al-Ansaary, a leader in the Supporters of *Shari'ah* had criticized the double standard of the hireling government to America and the West, led by the falsely elected president Abdorabo Mansoor Hadi, who declared war on the base of jihad while he called the Shiites Houthis to the table to negotiate concerning the future of Yemen.

Al-Ansaary considered this duplicity to be a result of the American flagrant intervention in the country's internal policies that is done through their ambassador who is the actual ruler of Yemen, who meddles in all of Yemen's affairs, who persists in dictating America's orders which battle against the magnanimous Islamic *Shari'ah*, and then directs his instructions to Hadi and his gang to fight al Qaeda. Al-Ansaary wondered if Abdorabo's standard of preference was the innocence from shedding the Yemenis' blood, then why did he call the Houthis to negotiation even though they killed and are still slaughtering hundreds of *ahl as-Sunnah* in the North, besides killing a considerable number of soldiers in their sixth war with the army? Nevertheless, we confirm that the Supporters of *Shari'ah* do not target their fellow Muslims, rather our fighting is kept within the bounds of targeting America and her agents.

Al-Ansaary indicated that the most distinct evidence of Abdorabo's mercenary and subservience to the Americans the incident that he hasn't until now moved to the presidential palace in Sana'a, proceeding after an American orders for fear of the possibility of his assassination if there are still any remnant explosives planted in the palace since the days of Ali Saleh's presidency. The matter exceeded that to an American orders to Hadi to abandon his Yemeni escorts and replace them with American marines!!

Muhammad explained that the U.S. backs Abdorabo considering him her servant and not a partner. This is confirmed by the statement of Hillary Clinton when she commented on *Qat'u-Dhanab*'s raid by saying that her country will continue to work with the Yemeni president, Abdorabo Hadi Mansoor, emphasizing on backing him with full support. A support that was emphasized on by a high American official to a president of weak character who is no more than a puppet, its strings attached to Washington's fingers, controlling it as per their wish, preserving their interests before anything else and turning people away Allah and His messenger and waging war against His religion and His *Shari'ah*.

Al-Ansaary added in the same context, that the secretary reporter of the U.S. Defence stated in his commentary on the same raid that America considers Yemen a very important partner in the exerted effort of combating terrorism. He expressed that America is also very worried on account of the clashes which took place there, and also due to the advancement of al Qaeda in the Arabian Peninsula to more regions in the country. He too emphasized on the continuation of the American support for Hadi.

Al-Ansaary said that the closest explanation of "the continuation of support" between America and Abdorabo has been disclosed by UAE's al-Kaleej newspaper: "Sana'a's regime got help from American Marine units in the military operation they carried out to recapture their bases that were taken over by al Qaeda armed fighters, among them is the armoured brigade no.39 from which al Qaeda gained an arsenal of advanced weaponry."

Al-Ansaary concluded his speech by stating: "We have sources speaking of the observation of American pilots entering to al-Anad military airbase in Aden, which seems to be a preparation to carry out airstrikes on Abyan with the participation of those pilots. This move is not ruled out in the light of the reported details. All of this information prove America's persistence to drive forcibly the Yemeni forces to confront al Qaeda which considers the U.S. and her Western allies to be their number one enemy."

Taking by storm one of the enemy's tanks, then used it to attack the enemy's forces

Madad exclusively reveals the heroic actions of the mujahideen of *ash-Shari'ah* Supporters in the raid of «*Qat'u-Dhanab*»

Seven days have passed since the successful raid of *Qat'u-Dhanab*, whereby the mujahideen from among the Supporters of *Shari'ah* in the state of Abyan, south of Yemen. This raid still echoes until now in the circles of official political observers, analysts and in several local and international news media.

As usual, Madad has been the closest to the event, seeking to convey a little of plenty of exciting details. Madad correspondents reported the heroic actions of the mujahideen in that raid which resulted in the killing of approximately 200, including soldiers and officers from both the armoured brigade no.39 in al-Khod area and the infantry soldiers brigade no.115 soldiers in Dowfas. Given the fact that brigade no.115 is under the control of the Sana'a's government forces that is centralized in Abyan's state. Nearly, as much as that number were injured and 73 others were captured. The mujahideen have taken a lot of spoils and have destroyed huge quantities of the ammunition and weapons of the enemy, consisting of heavy, medium and light weaponry.

Turning during the sandstorm

First detail worth noting in this blessed raid is the aptly chosen decision along with success granted by the Almighty Allah regarding the timing to carry out a surprising attack, encircling the rear lines of Sana'a's forces immediately after the *Fajr* prayer, one day before the ending of the respite that was fixed for the mujahideen by Sana'a's government to withdraw from Abyan before brutally bombarding the province. The raid attack came simultaneously with the blowing of a sandstorm within the location of the attack. This helped the mujahideen advancing to cut off the tail of those forces without being monitored by the American spying drones that were as usual patrolling the airfield. However, on that particular day the drones weren't able to detect the sneaking of the mujahideen into the enemy's ranks as a result of the sandstorm. It was as it is said " If Allah wants something to occur, He arranges its means".

The mujahideen also benefited massively from this soldier - the sandstorm - which Allah made serviceable to them just as occurred in the battle of *al-Aúzab* [The combined forces], considering that it blocked the view of the American drone aircrafts and of the remaining of the enemy's forces until some time after the attack.

A rocket launcher [katyusha] taken as booty by the Supporters of *Shari'ah* in the raid of Qat'u-Dhanab

This circumstances enabled the mujahideen - by Allah's grace - to retreat safely to their bases with their spoils of heavy weapons without being targeted by any airstrike whether from the Americans or the Yemenis.

A military vehicle gained by the Supporters of Shari'ah

Remote control detonation

Before starting to attack, one of the mujahideen advanced forward with a booby-trapped vehicle to immerse with it into one of the enemy's brigade. However, when he reached the target, he found the place quite enough in a way that he could inflict a large number of casualties without resorting to the widely known immersing technique. So he proceeded in placing the vehicle in the most appropriate spot, he then retreated a distant away and later detonated it to cause a giant devastation; killing and wounding dozens of soldiers while the hero mujahid aligned himself once again with his fellow mujahideen to participate with them in fighting in another site of the battle.

An unusual incident

Among the strangest incidents that have been witnessed in the raid of *Qat'u-Dhanab*, took place in its beginning when a number of the mujahideen stormed into one of the enemy's tanks after they had sneaked close to it and then jumped on it, something that resulted in the immediate surrender of its driver after he froze out of bewilderment. The mujahideen then used the tank to bombard the enemy's sites.

The Mujahideen's objective

In his comment on this battle; a military source *ash-Shari'ah* Supporters asserted that all of what the mujahideen have achieved of victory, taken booties, breaking up the enemy's morale and exposing for what is made of, is first and foremost by the grace of Allah, the Powerful, the Exalted in Might who says in His Holy book: ***{And victory is not except from Allah, the Exalted in Might, the Wise} [3:126]***

The military source indicated that the mujahideen's objective is the establishment of the *Shari'ah* in the Muslims' lands, something which America and the hireling government of Sana'a reject., leading Sana'a's government to choose the option of escalation and war; particularly after Abdorabo took over the reins of government. The source then made clear that this government has to know that the expenses of war is extremely costly, and that war only give birth to another war. So it shouldn't be driven after the American orders which drive forcibly the army and Yemeni forces into a war that has no goals in it except ending up fighting the Islamic *Shari'ah* and the mujahideen.

The same source has confirmed that the frontline of fighting in the outskirts of Zinjibaar had been witnessing a proportional quietness in the recent days before this raid. Nevertheless the threats of the new Yemeni government to the mujahideen and the threatening of more American airstrikes required the mujahideen to give a lesson and a sample of the fierceness of the battle."

The tank used to bombard the enemy
